Click on the following link or type into a webpage.
https://vpn.msu.edu

Make sure you are using your ES user name and password which is the same user name and password you use to log onto your computer at work in the morning. Make sure the realm is CampusAD.

Select always.
Please keep in mind your personal drive which is F at work is now your home directory on the VPN. All the other drive letters are the same.
Select the desired drive letter or folder. You can also view your email from this page.

Please continue using [https://mail.campusad.msu.edu](https://mail.campusad.msu.edu) for mail.

Please select the home button to bring you to the main page at any time.

At the end of every session please use the sign out button.

**Deleting, downloading and uploading files**

**Delete**

To delete a file or folder from a network:

- Browse to the file or folder you want to delete and select the check box next to it.

- Click **Delete Selected**. After you confirm file deletion, the selected files and folders are permanently deleted from the network server.
Download

To download a single file from the network:

- Browse to and click the name of the file you want to download.
- In the Save As dialog box, browse to the directory on your computer where you want to save the file, enter a name in the File name field, and click Save.

To download multiple files and/or folders from the network:

- Browse to and select the files and/or folders you want to download by clicking on their respective checkboxes and click Download.
- Specify a name for the .zip file that the IVE saves in your local directory and click Download. The data you request is transferred as a single compressed .zip file from which you can extract the collection of files and/or folders you want to download from the network.

Note: If you have not already specified a default local target directory for downloading files, you are presented a Save As dialog where you can specify a local download target directory.

Upload Files

To upload files and/or folders to a network:

- Browse to the network directory where you want to save the files and/or folders.
- Click Upload File to access the upload page.
- On the upload page, click Browse to locate and select the files you want to save on the network.

You can specify up to five individual files using the fields available and specify names for them on the network by entering their names in the respective Save As fields.

Note: You cannot upload folders without first creating a .zip file in a local directory containing the folder(s) you want to upload. After creating the .zip file, you can upload the zipped file containing the folder(s).
